Professional Summary

Results-driven RCM Operations Director with 16+ years of hands-on experience managing end-to-end healthcare revenue cycles for US-based providers. Proven track record of identifying structural revenue leaks, optimizing workflows, and deploying AI-driven solutions to enhance financial performance. Deep expertise in denial management, coding compliance, authorization workflows, and team leadership across large-scale health system operations.

Professional Experience

Director, Revenue Cycle Operations

Dharma Solutions | June 2010 - Present

- Lead end-to-end RCM operations for US healthcare providers, managing denial management, coding compliance, billing workflows, and revenue optimization
- Identified and remediated structural revenue leaks including scheduling inefficiencies, coding errors, authorization gaps, and payer-specific denial patterns
- Drove implementation of AI and automation tools to improve denial recovery rates and reduce manual effort across the revenue cycle
- Built and led cross-functional operations teams, establishing KPIs, SLAs, and process documentation for consistent delivery

Level 2 Technical Support Engineer

Knoah Solutions / Earthlink | 3 Years

- Provided technical support for Earthlink, a major US ISP, resolving complex network and connectivity issues
- Served as escalation point for Tier 1 support, handling advanced troubleshooting and customer resolution

Technical Support Engineer

Sutherland Global Services | 1.5 Years

- Supported Windows 7 deployment and troubleshooting, ensuring smooth OS transitions for enterprise clients
 - Delivered technical solutions and customer support in a high-volume environment
-

Projects & Innovation

Founder — AgentWorks (Side Venture)

Building AI-powered tools for healthcare RCM, leveraging deep domain expertise and hands-on engineering.

Denial Doctor — AI-Powered RCM Platform

- Built a HIPAA-compliant multi-agent AI platform for healthcare claim denial management using Next.js, React, Tailwind CSS, and shadcn/ui
- Integrated Claude Opus LLM agents for automated analysis of CSV-based denial reports with instant AI-driven overview scans
- Implemented full denial-to-resubmission workflow: AI worklist, payer rules engine, appeals management, claim scrubber, and HIPAA-compliant audit logging
- Designed zero-friction onboarding with free instant overview scan to demonstrate value before contract commitment
- Deployed on Vercel with real-time AI agent status monitoring

Pipeline Tools (In Development)

- **Eligibility Tool** — AI-driven patient insurance eligibility verification
- **Auto Chart** — Automated clinical chart preparation from doctor-patient conversations
- **Scan-to-Claim** — Document scanning tool that auto-extracts demographics to eliminate manual entry errors
- **Dental Front Desk Agent** — Voice AI agent for dental practice front desk automation

GitHub Repositories

Building AI-native healthcare RCM tools including Denial Doctor (automated denial management platform) and Aria Whisper (AI voice agent for healthcare)

Publications

The \$50K Leak: An Operator's Playbook to Fix Hidden Revenue Loss in Healthcare RCM

Author: Rajesh Kantubhukta

Published: May 2026 | Amazon Kindle

A practical framework identifying structural revenue leaks in healthcare RCM — covering scheduling inefficiencies, coding errors, authorization gaps, denial management, and where AI adds real value vs. where it fails in production systems.
