Hiring Manager
HealthRecon Connect
India Operations

Re: VP – RCM Operations (End-to-End RCM) — Remote

Dear Hiring Manager,

I am writing to express my strong interest in the Vice President – RCM Operations position at HealthRecon Connect. With **16+ years of hands-on experience** managing end-to-end revenue cycle operations for US healthcare providers — spanning scheduling, eligibility verification, coding compliance, billing, denial management, appeals, and payment recovery — I bring exactly the operational depth and leadership this role demands.

As Director of Revenue Cycle Operations at Dharma Solutions since 2010, I have built and led cross-functional RCM teams, established KPIs and SLAs, and driven measurable improvements in denial recovery and revenue optimization. I have identified and remediated structural revenue leaks — from scheduling inefficiencies and coding errors to authorization gaps and payer-specific denial patterns — recovering significant lost revenue across client portfolios.

What sets me apart from other RCM leaders is that I don't just manage operations — I **build the technology that transforms them**. I am the founder and architect of Denial Doctor, a HIPAA-compliant multi-agent AI platform for healthcare claim denial management. This production system uses 6 specialist AI agents (Orchestrator, Demographics, Eligibility, Coding, Billing Scrubber, and Appeals) with anti-hallucination guardrails to process denied claims end-to-end — from classification through corrected code generation, scrubbing, and appeal letter drafting. This unique combination of deep domain expertise and AI product engineering allows me to bridge the gap between RCM operations and technology innovation in ways that few candidates can.

I am also the published author of *The \$50K Leak: An Operator's Playbook to Fix Hidden Revenue Loss in Healthcare RCM* (Amazon Kindle, 2026), which demonstrates my thought leadership and deep understanding of where revenue actually leaks in healthcare operations — and where AI adds real value versus where it fails in production.

HealthRecon Connect's focus on end-to-end RCM for multi-specialty physicians and hospitals aligns perfectly with my experience. I am confident that my operational expertise combined with my ability to drive AI adoption and process optimization would deliver immediate and measurable impact on your RCM performance metrics.

I would welcome the opportunity to discuss how my experience can contribute to HealthRecon Connect's growth and operational excellence. I am available for a conversation at your earliest convenience.

Rajesh Kantubhukta

Director, Revenue Cycle Operations | Healthcare RCM + AI
