Hiring Manager

IKS Health

Remote — Director, RCM Implementations

Re: Director, RCM Implementations — Healthcare (Remote)

Dear Hiring Manager,

I am applying for the Director, RCM Implementations role at IKS Health. With **16+ years leading end-to-end RCM operations** for US healthcare providers and a track record of building AI-powered RCM solutions from scratch, I bring both the operational depth and the solution design capabilities this role requires.

At Dharma Solutions, I have directed the full revenue cycle — from scheduling and eligibility through coding compliance, billing, denial management, and appeals — for multi-specialty US healthcare practices. I have built and led teams of 20+ professionals, established KPIs and SLAs, and driven structural improvements that recovered lost revenue across client portfolios. This hands-on operational experience means I understand exactly what a successful RCM implementation looks like from the provider's perspective.

Beyond operations, I have **architected and shipped a production AI platform for denial management** — Denial Doctor. This HIPAA-compliant system integrates 6 specialist AI agents that process denied claims end-to-end: classifying denial types, generating corrected CPT/ICD-10 codes, scrubbing claims for resubmission, and drafting appeal letters with verified regulatory citations. Building this platform required deep solution design, stakeholder alignment, and iterative deployment — the same skills needed to lead RCM implementations at scale.

IKS Health's focus on combining technology with operational expertise resonates strongly with my career trajectory. I have lived at the intersection of RCM operations and technology innovation for years, and I understand how to translate complex RCM workflows into implementable, scalable solutions that drive measurable outcomes for healthcare organizations.

I would welcome the opportunity to discuss how my implementation experience and AI product background can accelerate IKS Health's RCM delivery capabilities.

Rajesh Kantubhukta
