Hiring Manager
Optum India — UnitedHealth Group
Hyderabad, Telangana

Re: Associate Director, Back Office RCM Operations — Hyderabad

Dear Hiring Manager,

I am applying for the Associate Director, Back Office RCM Operations role at Optum India. With **16+ years of experience leading end-to-end revenue cycle operations** for US healthcare providers and a proven track record of driving AI adoption in RCM workflows, I am confident I can deliver high-impact results for Optum's large-scale back-office delivery operations.

As Director of Revenue Cycle Operations at Dharma Solutions, I have managed the full RCM lifecycle for multi-specialty US healthcare practices — from eligibility verification and coding compliance through billing, denial management, appeals, and payment recovery. I have built and led teams of 20+ professionals, established KPIs and SLAs, and driven measurable improvements in denial recovery rates and revenue performance across client portfolios.

I bring an additional dimension that is rare in RCM leadership: **I architect and ship AI-powered RCM products**. I am the founder of Denial Doctor, a production HIPAA-compliant multi-agent AI platform for claim denial management. This system uses 6 specialist AI agents to classify denials, generate corrected CPT/ICD-10 codes, scrub claims, and draft appeal letters with verified regulatory citations. At Optum — a company that sits at the intersection of healthcare, technology, and scale — this dual capability is directly relevant to driving end-to-end revenue outcomes through both operational excellence and technology innovation.

Optum India's position as the global capability center for UnitedHealth Group makes this role especially compelling. I am based in India and have extensive experience working US hours managing US healthcare RCM operations remotely. I am ready to contribute to Optum's mission from day one.

I look forward to discussing how my operational leadership and AI product expertise can support Optum's RCM delivery and innovation goals.

Rajesh Kantubhukta

Director, Revenue Cycle Operations | Healthcare RCM + AI
