Hiring Manager
Plutus Health Inc
Hyderabad, India

Re: Director — RCM

Dear Hiring Manager,

I am writing to apply for the Director — RCM position at Plutus Health. As an **Inc. 5000 fastest-growing company** providing full-cycle RCM services — including medical coding, billing, denial management, and credentialing — Plutus Health's trajectory aligns perfectly with my experience and ambitions.

With **16+ years directing end-to-end RCM operations** for US healthcare providers, I bring deep expertise across the entire revenue cycle: scheduling, eligibility verification, coding compliance (CPT/ICD-10), billing workflows, denial management, appeals, and payment posting. At Dharma Solutions, I have built and led cross-functional teams, established KPIs and SLAs, and driven structural improvements in denial recovery, coding accuracy, and revenue optimization for multi-specialty practices.

Beyond operational leadership, I bring a critical differentiator: **I build AI-powered RCM technology**. I am the founder of Denial Doctor, a HIPAA-compliant multi-agent AI platform for claim denial management currently in production. This platform processes denied claims end-to-end using 6 specialist AI agents — from classification through corrected code generation, scrubbing, and appeal letter drafting with verified regulatory citations. As Plutus Health scales, this combination of operational depth and AI innovation capability can help drive both efficiency gains and service differentiation.

Plutus Health's SOC certification and HIPAA compliance are standards I have maintained throughout my career. I am based in India, experienced in US healthcare operations working US hours, and ready to contribute to Plutus Health's continued growth from day one.

I would welcome the opportunity to discuss how my RCM leadership and AI product expertise can support Plutus Health's expansion and operational excellence.

Rajesh Kantubhukta
