PROFESSIONAL SUMMARY

Results-driven **RCM Operations Leader with 16+ years** managing end-to-end healthcare revenue cycles for US-based providers — from scheduling and eligibility through coding, billing, denial management, appeals, and payment recovery. Proven track record of identifying structural revenue leaks, deploying AI-driven solutions, and building high-performance operations teams. Unique dual profile: **deep domain operator who also architects and ships production AI products** for healthcare RCM, including a HIPAA-compliant multi-agent denial management platform currently in production. Published author on RCM revenue loss patterns.

PROFESSIONAL EXPERIENCE

Director, Revenue Cycle Operations

June 2010 — Present | 16 years

Dharma Solutions

- Lead end-to-end RCM operations for US healthcare providers across multiple specialties — managing patient scheduling, insurance verification, coding compliance, billing workflows, denial management, appeals, and payment posting
- Identified and remediated structural revenue leaks including scheduling inefficiencies, coding errors, authorization gaps, and payer-specific denial patterns — recovering **significant lost revenue** across client portfolios
- Drove implementation of AI and automation tools to improve denial recovery rates and reduce manual effort — achieving faster turnaround on claim corrections and appeal submissions
- Built and led cross-functional operations teams of 20+ professionals, establishing KPIs, SLAs, and process documentation for consistent delivery quality
- Managed payer relationships and contract analysis to optimize reimbursement rates and reduce underpayment occurrences
- Oversaw compliance with HIPAA, SOC 2, and healthcare regulatory requirements across all operational workflows

Level 2 Technical Support Engineer

3 Years

Knoah Solutions / Earthlink

- Provided Tier 2 technical support for Earthlink, a major US ISP — resolving complex network and connectivity issues for enterprise and consumer clients
- Served as escalation point for Tier 1 support, handling advanced troubleshooting and reducing average resolution time

Technical Support Engineer

1.5 Years

Sutherland Global Services

- Supported Windows 7 enterprise deployment and troubleshooting, ensuring smooth OS transitions for corporate clients

AI PRODUCTS & INNOVATION — AGENTWORKS

Denial Doctor — AI-Powered Denial Management Platform (In Production)

- Architected and built a **HIPAA-compliant multi-agent AI platform** for healthcare claim denial management using Next.js 16, React 19, TypeScript, Turso/libSQL, and Azure OpenAI
- Designed 6 specialist AI agents — Orchestrator, Demographics, Eligibility, Coding, Billing Scrubber, Appeals — each with defined scope boundaries and anti-hallucination guardrails
- Coding agent **generates corrected CPT/ICD-10 codes** (not just flags) using rule-based logic first, AI generation as fallback — with confidence scoring and human review gates
- Appeals agent generates complete appeal letters with verified regulatory citations (42 CFR, LCD, NCD) — never inventing citations
- 3-level product architecture: L1 (Scan & Score), L2 (Fix & Appeal with prescriptive corrections), L3 (EHR Auto-Fix — autonomous integration)
- Deployed on Vercel at denialsdoctor.com with real-time agent status monitoring and FHIR R4 / X12 EDI integration roadmap

Pipeline Tools (In Development)

- Eligibility Tool — AI-driven patient insurance eligibility verification
- Auto Chart — Automated clinical chart preparation from doctor-patient conversations
- Scan-to-Claim — Document scanning with auto-demographic extraction to eliminate manual entry errors
- Dental Front Desk Agent — Voice AI agent for dental practice front desk automation

PUBLICATION

The \$50K Leak: An Operator's Playbook to Fix Hidden Revenue Loss in Healthcare RCM

Author: Rajesh Kantubhukta | Published: May 2026 | Amazon Kindle

Practical framework identifying structural revenue leaks in healthcare RCM — scheduling inefficiencies, coding errors, authorization gaps, denial management failures, and where AI adds real value vs. where it fails in production.

CORE COMPETENCIES

- | | |
|--|---|
| ▶ Healthcare Revenue Cycle Management (End-to-End) | ▶ AI/ML in Healthcare Operations |
| ▶ Denial Management & Appeals Strategy | ▶ Coding Compliance & Audit (CPT/ICD-10) |
| ▶ Payer Relations & Contract Management | ▶ Process Optimization & Workflow Design |
| ▶ Team Leadership & Operations Strategy | ▶ Data Analysis & Revenue Performance Reporting |
| ▶ HIPAA Compliance & SOC 2 Operations | ▶ Next.js, React, TypeScript, Azure OpenAI |

EDUCATION

Master of Business Administration (MBA) IGNOU — Indira Gandhi National Open University	2010
Bachelor of Technology (B.Tech) — Mechanical Engineering IME — Institute of Mechanical Engineers	2005
